Think of it as a giant battery that stores surplus energy (often from solar or wind) as compressed air in underground caverns. When the grid needs power, that air gets released, running ...

Hydrostor's GEM A-CAES has received a conditional loan guarantee of up to \$1.76 billion from the US Department of Energy (DOE) to build the Willow Rock Energy Storage Center, a cutting ...

This technology strategy assessment on compressed air energy storage (CAES), released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic ...

An overlooked technology for nearly 50 years, the world's largest liquid air energy storage facility is finally set to power up in 2026. It's hoping to compete with grid-scale lithium...

Form Energy was founded by energy storage veterans who collaborated in 2017 on a unified mission to reshape the global electric system by creating a new class of low-cost, multi-day energy storage ...

The Biden administration has offered a \$1.76 billion conditional loan guarantee to Hydrostor's Willow Rock advanced compressed-air energy storage project in California, which aims to store energy ...

Energy Secretary Chris Wright said Friday he canceled nearly \$4 billion in project grants, in another massive blow to clean energy and greenhouse gas emissions reduction efforts in the U.S. under ...

A roundup of the biggest projects, financing and offtake deals in the sector that Energy Storage News has reported on this year.

The U.S. Department of Energy is considering terminating 300 additional clean energy projects worth over \$15 billion, according to a leaked list reviewed by The Times.

Compressed-air energy storage, a decades-old but rarely deployed technology that can store massive amounts

13 billion air energy storage project

of energy underground, could soon see a modern rebirth in California's ...
