---

For the first time ever, CEMEX and Synhelion successfully connected the clinker production process with the Synhelion solar ...

Advancing from that stage to production under plant-like and continuous conditions reaffirms the tremendous potential of this ...

Switzerland-based Synhelion and Mexican construction materials supplier Cemex have started building a high-concentration solar ...

Research and development (R& D) teams at clean energy firm Synhelion and Mexican construction materials maker Cemex SAB de CV ...

This project aims to study conditions to maximize heat transfer to the raw cement mix, further advancing the cause of solar-powered cement ...

In the present work, the authors have attempted to design a solar cement plant for supplying solar energy to the cement industry. A case study was done, which investigated a ...

Polinovel 2MWH commercial energy storage system (ESS) is tailored for high-capacity power storage, ideal for large-scale renewable energy ...

Emerging markets in Africa and Latin America are adopting industrial storage solutions for peak shaving and backup power, with typical payback periods of 2-4 years.

CEMEX and Synhelion announced today the successful production of the world's first solar clinker, the key component of cement, ...

## 2MWh Photovoltaic Container Used in Latin American Cement Plants

Aligned with global trends, the installed solar photovoltaic capacity in Latin America and the Caribbean has greatly increased in the last decade, surpassing 85 gigawatts ...
