What is a 42U server rack?

A 42U rack refers to a server rack that occupies 42 units of vertical space. These racks are typically used in data centers for mounting servers and other equipment. What is the height of a 42U server rack? The height of a 42U rack is 73.5 inches (1866.3 mm), as each unit (U) is 1.75 inches (44.45 mm), and 42U is forty-two times that.

How do I choose a 42U rack or cabinet?

When selecting a rack or cabinet there are several factors to consider. A 42U rack or cabinet can house equipment whose total height when placed into the rack is no more than 1.87m. Care therefore has to be taken when selecting a rack to make sure that there cabinet height is sufficient to house the IT server, networking peripheral or IoT device.

How long does it take to get a 42U server cabinet?

An enclosed cabinet with a front and rear door and side panels is more secure and will provide with more efficient airflow management. We supply a wide range of 42U server cabinets made to order and stocked in the UK. The typical lead time is 5-7 days unless the cabinet is ex stock at time of order.

How much does a 42U rack weigh?

The weight of a 42U rack varies depending on the design and material, but it typically ranges from 150 to 250 pounds (68 to 113 kg). What is the power consumption of a 42U rack? The power consumption of a 42U rack depends on the equipment installed within it. It varies based on the number and type of servers, networking devices, and other hardware.
