The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder.

Designed for rooftops and construction sites, this lightweight and durable lift allows one person to raise solar panels easily and securely. Ideal for residential and commercial PV projects, it reduces labor, improves ...

Specially designed with a custom carrier that functions as a cargo receptacle, GEDA's solar panel lift is a space-saving way to reach inaccessible loading areas.

A reliable manual solar panel lifting device reduces labor strain, enhances precision during placement, and improves job site safety--especially when handling multiple panels across residential or ...

Solar panel lift designed for safe and efficient rooftop PV installation. Customizable lifting height and load capacity. Ideal for solar installation projects. Contact us for a fast quotation.

At TAWI, we help solar manufacturers handle panels safely and efficiently with innovative solar panel lifting equipment designed for precision and ease of use. Each TAWI solar panel lift is built to protect ...

The TranzVolt is a battery powered, solar panel hoist, which allows for the vertical lift of modules to the rooftop. This is an excellent option for projects located in remote, off grid, or new construction areas where power is ...

The Fluke Module Lift(TM) is designed to safely and quickly transport a PV module to a roof, streamlining the installation process of solar panels. This innovative tool enables you to lift solar modules to the roof with ...

The GEDA Solarlift has particularly been designed for working with sensitive materials and offers a specific solar platform for a safe transport of expensive solar panels.

A relatively safe photovoltaic panel lift

It takes less than 30 seconds to safely and easily lift solar panels and equipment to a two-story roof. At the end of the day simply tuck your lift into a regular work van, or even a car, where it is ready to set up at the next ...
