According to a statement by the ministry, the partnership covers the full production cycle of LFP batteries, from raw material extraction to battery component manufacturing, with an initial ...

The project will include four stages: creating a dedicated lithium management unit, technical partnership with Professor Karim Zaghbi, feasibility studies for processing phosphate ...

Algeria's lithium battery disposal factory investment grows in 2025, reflecting global recycling trends and sustainable industry development.

## Algeria lithium battery production plant

The discovery of lithium in Algeria is a major economic opportunity - but underinvestment in the country's mining industry means it could take a decade or more to bear fruit, experts say.
