-----  
Which solar panel adhesive tape is best?

Our high-quality solar panel adhesive tapes, tesa &#174; 62510 double coated PE foam tapes, are favored by manufacturers for simplifying solar module assembly thanks to their high ultimate adhesion levels and inner strength. And of course, both tapes are engineered for outdoor use thanks to their UV, water, and age resistance.

Do you need a bonding solution for solar panels?

Whether you want to bond back rails to photovoltaic modules, a mounting system to heliostat mirrors, or a glass cover to solar thermal modules, you need a bonding solution that offers the durability and performance needed.

Why should you choose PE-foam backing?

The PE-foam backing offers an ideal balance of good conformability and high inner strength. We have optimized the acrylic adhesive for effortless application and secure adhesion on most backsheets. During the lay-up and lamination process, the solar cells must be kept firmly in place and the strings need to be perfectly aligned.

Do photovoltaic modules need bus bars?

Some photovoltaic modules require bus bars on the sunny side. In close cooperation with our customers, our experts have developed special black-out tapes with low light transmission, high dielectric strength and low-volatility organic component content.

Proper selection of bonding adhesives and protective coatings are critical to the long-term reliability of solar cells, modules, panels and installed systems. With over 30 years of experience in ...

Backsheet silicone coating boosts PV module protection, resists moisture and UV, and makes cleaning easier for longer-lasting, efficient solar panels

Ideal for high-performance solar photovoltaic backsheet coatings, HN-5562 excels in improving adhesion between the coating and EVA, POE, and other adhesive films. Even a small ...

To meet the growing demand for electricity while reducing carbon emissions, the world is turning more

# Back coating adhesive for photovoltaic panels

towards eco-friendly power generation such as solar. Here at tesa, we have developed proven, ...

Adhesive Resin HN-5562 for Solar Photovoltaic Backsheet Coatings Principal Properties & Application: HN-5562 is a solvent-based one-component product with a backbone structure containing special ...

Sika adhesive technologies empower photovoltaic, CSP and solar thermal providers with enhanced design options, cost reductions, and efficiency through material savings and process ...

Compare the top 10 PV adhesives for solar panels by durability, cost, and eco-friendliness to choose the best solution for your solar manufacturing needs

Sealing and coating photovoltaic modules where low viscosity and self-leveling properties in combination with non-corrosive cure is required. Designed for applications which demand a strong but flexible ...

These monomers significantly enhance interfacial adhesion, making it ideal for high-performance solar photovoltaic backsheet coatings. The application of HN-5562 improves the ...

Adhesive Resin HN-5562 for Solar Photovoltaic Backsheet Coatings Principal ...

Adhesive solutions that power innovation As a global technology leader, Adhesives Research (AR) provides connectivity, moisture barrier, and dielectric protection to critical electronics ...
