Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet. See Figure 2 and Figure 3 for line-up-and-match configuration views. Contains two or three battery strings to be used with the 93E 30 kVA UPS.

Can a battery cabinet be used with a ups?

The battery cabinet frame is not referenced to the DC circuit. Each battery cabinet has its own overcurrent protection device. External battery cabinets can be used in combination with a UPS containing internal batteries. Internal battery strings are to be connected by an authorized Eaton Customer Service Engineer.

Where is the UPS battery cabinet located?

The battery cabinet may be located to either the right or left of the UPS cabinet. This procedure assumes the battery cabinet is located to the right of the UPS cabinet. 14. If line-up-and-match installation, remove the rectangular and circular knockout on the bottom and top front side of the UPS and the IBC-SW (see Figure 9). 15.

How do you wire a battery cabinet?

Secure the battery wiring to the wire tie anchors (see Figure 24) using Zip ties. Route the battery cabinet ground wiring from the UPS through the bottom side inter-cabinet access pass-through (see 4.4.1 Line-Up-and-Match Power Wiring) of the UPS cabinet and IBC-SW to the IBC-SW ground terminal block.

Use the procedures and illustrations in this section to create a logical plan for installing the battery cabinet. This section contains the following information:
