Fastned has opened its 50th electric vehicle (EV) charging station in Belgium, located at the Genk-Oost carpool parking near exit 32 of the E314. The station features the company's ...

The ROI remains fast in Brussels (3.5 to 4.5 years) and slightly longer in Wallonia and Flanders (6 to 9 years). For larger households with a heat pump and one or two electric cars, a 10 kWp system is ...

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours. Go big with our modular design for easy ...

Charge up to 333 km in 10 minutes at 350+ locations across Europe. Reliable fast charging powered by 100% green energy with chargers up to 400 kW.

Charging infrastructure roll-out in Belgium with over a dozen of ADS-TEC's all-in-one solution, ChargePost. Profitable build-out and operation of charging infrastructure thanks to...

With how quick charging stations are set up right now, you basically have two options. Either unhitch the trailer in a parking spot and go charge the vehicle, which is the nice guy option.

The deployment, which will be supported by local energy platform MobilityPlus, is expected to significantly expand HyperFast's fast-charging infrastructure by the end of the year.

The fast-charging stations provide 100% renewable energy of Belgian origin. Many locations are equipped with impressive canopies, built with sustainable materials like wood.

Mobility player Q8 and renewable energy company Storm have broken ground on the first four fast charging stations, which will be opening in July.

From now on, HyperFast and MobilityPlus are combining their efforts to rapidly increase the number of fast
