To help select and implement the best resilient power solution for your situation, this document provides an overview of the key traditional (e.g., generators) and newer (e.g., renewables, microreactors) ...

In this article, an algorithm for automatic control of energy sources was developed to improve the uninterrupted power supply of mobile communication base stations. Based on the proposed ...

Modern building codes and standards acknowledge the vulnerability of electrical power supplied by utilities, and therefore require that most buildings have at least some emergency power ...
