CellCube stands as a pioneering force in sustainable, long-lifecycle energy storage--offering modular, safe, bankable, and environmentally conscious battery systems built to ...

Flexible, modular and individually applicable - that is CellCube, the redox flow energy storage system based on vanadium. The modules of the individual CellCube families can be combined simply and ...

Enter the Cell Cube vanadium redox flow battery system - a game-changing technology already deployed in 23 countries, including Germany's pioneering renewable energy projects. Lithium ...

CellCube is a leader in vanadium flow battery technology, offering safe, sustainable, and cost-effective energy storage solutions--with the longest-running battery in the field. Designed and manufactured ...

The CellCube energy storage system, which was tested and proven in practice for over five years, solves the problem of energy storage. It presents uninterrupted supply of power from solar ...

With over 14 years of proven performance and more than 130 installations worldwide, the company develops and manufactures advanced energy storage solutions designed for long-duration storage ...

CellCube intends to be a fully integrated producer of vanadium, vanadium electrolytes and vanadium redox flow batteries for the Energy Storage Market. We put 15 years of research and development ...

We are your trusted partner throughout the entire lifespan of your energy storage system. In today's energy landscape, grids require mature, reliable, and scalable storage solutions.

With the CellCube system, we provide a clean, reliable and sustainable option for long-term energy storage. The CellCube system also meets the most stringent safety standards.

That's where CellCube energy storage systems come into play, acting like a giant power bank for the grid.

Cellcube storage systems

Unlike your smartphone's lithium-ion battery, these vanadium flow batteries offer something ...
