How a mobile light tower works?

Then an autonomous light tower is the ideal solution. This tower runs on batteries and, where possible, is supplemented with solar energy. After a few days, the mobile light tower is retrieved and recharged. Good site lighting ensures that employees can work safely and effectively.

How long does it take to install a mobile light tower?

A mobile light tower can be installed in less than 10 minutes. Compared to lighting on scaffolding, poles or with counterweights, bracing and cabling, this is a much cheaper and more efficient solution. For short-term projects of several months, renting is usually the preferred choice.

Do you need a mobile light tower?

On sites without fixed infrastructure, such as posts, fences or walls, there is often still a need for lighting. In such cases, a mobile light tower offers the ideal solution: it is easily movable and quick to install. What are the advantages of a mobile light tower over fixed lighting?

What is a mobile light tower?

A mobile light tower is ideal for temporary projects, such as construction sites or events, as well as for situations without fixed infrastructure, such as poles, walls or power supply.
