Do solar inverters come with a warranty?

String inverters typically come with 10-12 years of warranty coverage, whereas microinverters and power optimizers are often covered for 25 years. Labor and shipping expenses are generally not included in solar inverter warranties, but some of the strongest brands will cover one or both of these costs.

Do I need insurance if I buy a new inverter?

Most insurers insure your items as "new for old". For example, if you bought an inverter three years ago, you would insure it for what it would cost if you had to buy it new today - not what it cost you three years ago and not what a three-year-old (i.e. second-hand) inverter would cost. This is known as replacement value.

Does solar insure cover solar panels?

Solar Insure's 30-year monitoring and warranty for solar panel systems covers parts, labor, and roof penetrations. There is also a 20-year battery monitoring and warrant option, including monitoring, parts, repairs, and labor coverage, plus a complete battery replacement if capacity is below 30% between years 11 and 20.

Do you need an inverter for a solar energy system?

Inverters are the unsung heroes of solar energy systems. Without them, you wouldn't be able to harness the power of your solar panels to power your home. Solar panels generate direct current (DC) electricity, but most home appliances require alternating current (AC) electricity.
