Tanzania relies on several energy resources for its power generation. About 45% of the country's electricity comes from hydro. However, poor rains in the past few years led to water shortages that affected ...

The generation, transmission, and distribution of electricity in Tanzania, is channeled through TANESCO, which is fully owned by the government and is responsible for 98% of the electricity produced in ...

The electricity sector is governed by the 2008 Electricity Act, amended in 2016, promoting competition and rural electrification. The Rural Energy Agency (REA) drives off-grid and rural electrification projects.

One of the critical insights from this report is the composition of our energy mix and the trends that have emerged in 2022.

Official and up-to-date data of Tanzania for all years of statistics, in an easy-to-read format. Analysis of consumer electricity prices with advanced tools for comparisons, trends, shares, and various metrics.

Tanzania's moderate electricity prices strike a balance between affordability and development needs. The country is regionally competitive, particularly compared to East African neighbors.

In a Budget speech delivered by the Ministry of Energy on 28 April 2025, it was announced that a deal is being finalised to import 100 MW of electricity from Ethiopia, at a lower cost of USD 0.077 per kWh, ...

Market competition analysis indicates that TANESCO accounts for 91% and 83% of the installed capacity and energy generation in the electricity generation market share respectively.

Unlike other energy commodities such as coal, oil and natural gas, electricity trade between countries is relatively limited as it is more technically complex and requires a direct cross-border interconnection.

Since 2019, the average electricity price in Tanzania has fluctuated between ~\$76/MWh in 2024 and

Electricity market tanzania

~\$86/MWh in 2019. The top amount of capacity installed in Tanzania in 2024 was in Hydro at 1.75GW, up from ...
