Portugal aims to be climate neutral by 2050 and to cover 80% of its electricity consumption with renewables by 2030. Portugal has also developed a hydrogen strategy to decrease natural gas imports and reduce greenhouse gas emissions by 2030.

To bolster low-carbon electricity generation, Portugal could expand its already successful wind and solar energy sectors. Emulating countries with strong clean energy credentials could also be beneficial.

OverviewLeading Sub-SectorsMiningWind GenerationOpportunitiesResourcesPortugal ranks as the 11th EU member state most dependent on imported energy sources, with a decreasing dependence since 2000, when 85% of its energy was imported. This is mainly due to the lack of fossil energy sources, which continues to impact the total consumption of primary energy significantly. The main fossil fuels that account for the prima...See more on [trade.gov](https://www.trade.gov).b_imgcap_alttitle p strong,b_imgcap_alttitle .b_factrow strong{color:#767676}#b_results
