This checklist provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery energy storage systems (BESS) project development.

Program-funded project activities include but are not limited to identifying energy resilience projects, local energy development in power, transportation and/or buildings, and stakeholder engagement.

Dr. Caitlin Callaghan 240-937-6453 [caitlin.callaghan@hq.doe.gov](mailto:caitlin.callaghan@hq.doe.gov) Energy Efficiency and Conservation Block Grant Program (EECBG) EECBG Matt Blevins 240-562-1366

Optional. 1 page maximum. See Section III.D of the NOFO for content requirements.

OMB Control No. 1910-5141 Exp. Date Under OMB Review

The Department of Energy (DOE) has designated individuals who contribute in a substantive, meaningful way to the project proposed to be carried out with an award from DOE, at both the prime ...

DOE will use the data from this form to obtain current information regarding emergency situations on U.S. electric energy supply systems. DOE's Energy Information Administration (EIA) will use the data ...

This document is meant to be used as a customizable template for federal government agencies seeking to procure lithium-ion battery energy storage systems (BESS).

b Energy Efficiency Ratio (EER) is the ratio of the average rate of space cooling delivered to the average rate of electrical energy consumed by the air conditioner or heat pump. This ratio is expressed in ...

Its intent is to inform the site of potential energy saving opportunities and very rough cost savings. The purpose of the recommendations and calculations is to determine whether measures warrant further ...
