According to the Q4 2025 US Energy Storage Monitor from Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP), 2025 energy storage installations surpassed ...

U.S. solar and energy storage are poised for significant growth in 2025. Explore the trends driving this transformation today!

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 when power ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity.

Explore the top 25 BESS projects in the US and uncover the key players driving America's energy storage boom.

Previously, China made another major policy move by scrapping its energy storage mandate for renewable energy projects. Effective June 1, new renewable energy plants are no longer required to install ...

Wood Mackenzie projects Q4 2025 will set a record for the residential sector as customers accelerate installations ahead of the Section 25D tax credit expiration.

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will play a ...

Energy storage projects to be put into operation in 2025

The US Energy Information Administration expects 18.2 GW of utility-scale battery storage resources to come online this year, or 29% of anticipated capacity additions, second only to solar with 32.5 ...
