The Vatican is now completely powered by a farm that sports solar panels to help shade-tolerant crops thrive. This new coupling of solar and agriculture is growing fast.

Italy agreed Thursday to a Vatican plan to turn a 430-hectare field north of Rome, once the source of controversy between the two, into a vast solar farm. The Holy See hopes it will generate...

The solar farm will also prioritize agricultural use of the land and aim to reduce environmental disruption. The project is expected to cost less than EUR100 million (\$114 million), with ...

There's no country anywhere on Earth that's entirely powered by renewable energy every day, but that's soon to change. In a letter released on June 21 entitled "Brother Sun" Pope Francis ...

With the Apostolic Letter "Fratello sole," issued motu proprio, Pope Francis provides for the construction of an agrivoltaic plant in the extraterritorial zone of Santa Maria in Galeria, where ...

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

The Vatican has been seeking to drastically reduce its environmental impact by adopting more renewable energy sources, pursuing a goal of zero emissions by 2050 and assembling a net ...

The world's smallest country just made a big move: Vatican City is now powered entirely by solar energy, setting an example for global climate action.

In line with the principles of the encyclical "Laudato Si" and a United Nations agreement on climate change, Pope Francis is making the Vatican "greener." Pope Francis has ordered the ...

Environmental project using Vatican off-grid solar container 25kW

In a quiet corner of the Roman countryside, an ambitious project is taking shape--one that seeks not only to power the Vatican City entirely through renewable energy, but also to embody the...
