The external energy meter + CTs must be installed correctly or else there will be problems with export/import/consumption power monitoring and control. First, check the installation ...

Learn why your solar export limiting is active and how to troubleshoot it effectively.

This system shows export issues as there is no curve to the generation (green) and there is no export figures or grid readings in general (shown as yellow). This was due to incorrect CT ...

To set up the system for minimum export, change this value with the Up and Down buttons to read "+00000W" and then press Enter. In order to get maximum export, change this value ...

I am hoping to setup a Solax Hybrid Gen 2 (SK-SU5000E) as an UPS (zero export) and having issues with getting the export control feature working that is listed in the manual.

The solar export flag is updating when the settings change. But when i change the setting from ha, it only turns off, it wont turn it back on. The sensor in ha says its changed, but it hasnt, and ...

i Would try to talk to them direct and put across your requirements, You single pahse, heat pump charger solar looped supply i can see them worrying about that massive bank of batteries ...

You would need to turn off Export in the SolArk and on the GT inverters. I do not know of any way for a SolArk to modulate AC coupled solar because the grid is passed through and the SolArk has no ...

I have a problem with my system when enabling export limit and setting it to 0% export. When I do that my system, stops exporting to the grid, but keeps generating a residual power (100 to ...

Fact sheet hen a solar system has stopped working. In thi graph, solar export is shown in green. You can see solar power was exported for ten cons cutive days and then it stops entirely. If there is no ...
