-----

The switchgear comes with and accepts three 3000-amp Class L time delay fuses. Operation: The switchgear features a front control panel and rear termination equipped with a locking door.

Discover advanced 13.8kv switchgear solutions designed for reliability and efficiency. Enhance safety with cutting-edge technology, adaptable to diverse needs.

KYN28-12 (GZS1) is a type of high-voltage switchgear, equipped with VS1 (ZN63) vacuum circuit breaker with high breaking capacity and low current cutoff value as the main switch.

Each switchgear unit is subjected to routine tests in the factory before delivery. These tests are intended to provide a functional check of the switchgear based on the specific characteristics of each installation.

This panel applies to 13.8 ~ 24kv 3 phase AC 50Hz / 60Hz network for receiving and distributing power energy and also for control, monitor and protection. It can be arranged for single bus, single-bus sectionalizing system.

Our expertise in the industry, backed by top-tier manufacturing processes, ensures that you receive reliable and high-quality 13.8 kV switchgear tailored to your specific requirements.

New generation medium voltage switchgear with shielded solid insulation system (SSIS) PremSeT is durable and has a compact enclosure design for decreased risk and reduced maintenance while increasing reliability.

Search for used switchgear 13.8 kv. Find Stewart & Stevenson and W&#228;rtil&#228;; for sale on Machinio.

Get the best deals for 13.8kV Switchgear at eBay . We have a great online selection at the lowest prices with Fast & Free shipping on many items!

## Factory price 13 8 kv switchgear

KYN28 indoor metal-clad withdrawable switchgear (hereafter short as switchgear) is a complete power distribution device for 3.6~24KV, 3 phase AC 50Hz, single bus sectionalized system.
