---

The application of acoustical silencers and louvers offers superior noise reduction while accommodating the specified CFM for motor and radiator cooling of the generator.

Our range is covering wide range of different type and sizes of weather proof and silencers for diesel generators they are manufactured with a steel outer skin, and are lined with fire proof, acoustic material.

These openings cause the noise from the generator to escape out of the generator room into the atmosphere, causing municipal noise by-law infractions and disturbing the neighbors.

The generator noise control solution enables the consulting engineer to place a solution that will work in tight spaces and consider energy efficiency.

We work with facility teams to reduce generator noise using engineered enclosures, silencers, and airflow solutions tailored to your site. Our systems are built for performance, durability, and code ...

Reduce generator noise and emissions with silencers. Explore reactive, absorptive, and catalytic types, and understand EGSA ratings for optimal sound attenuation.

This Information Sheet discusses when sound attenuation of a generator system is required and the type of material and design used to achieve the standards set by various bodies.

KNC is unlimited in silencer sizing scheme and make fit-the-duct or opening sizes to meet any project need. KNC has streamlined, high capacity manufacturing that meets any delivery schedule.

Among these types, silencers in cylinder, disc, and rectangle shapes are very common, with inlets and outlets able to be located on both sides (Side-in, Side-out), both ends (End-in, End-out), or one side ...

# Generator room air inlet and outlet silencer

Legend Silencers and Exhaust Systems Silencer and Exhaust System Selection KD700-KD750-KD800-KD1000-KD2000-KD2500 No. of Weld Flange Kits Kohler Co. offers silencers rated for hospital, critical, residential, and industrial applications and stainless steel flexible exhaust connectors for unhoused generator sets. The accessories described in this spec sheet apply to open units unless otherwise stated. These silencers withstand exhaust flow pressure and temperature without creating exc...
