For the latest updates and more information, visit our website: <https://www.2xt.com.pl>

Unlike rigid single-capacity solutions, our modular design allows incremental expansion from 300Kwh to 500Kwh without service interruption. The phase-change thermal material embedded in battery racks ...

Equipped with function control software, it can control the main operation parameter settings on the remote PC machine, and realize the energy flow between the battery and the power grid in a timely ...

Flexible and Convenient: Modular PCS allows for linear expansion of battery units and bidirectional energy storage inverter units; it possesses independent charging and discharging control capabilities ...

It features a three-level battery management system that ensures robust protection against overcharging, over-discharging, and over-voltage. The modular design enables easy expansion and ...

Innovative rental and leasing models, as well as district storage solutions which allow private PV systems owners to feed their surplus energy into a central energy storage device, are also being ...

In addition to battery packs, BESS consist of two other main components: an energy conversion system and an energy management system, which monitors the power flow and the battery's temperature.

A flexible mid-node battery energy storage system (BESS) with rapid deployment and remote monitoring - Our 500 kW/250 kWh battery solutions are backed by engineering expertise to help reduce ...

As standalone operational units and due to their modular design, they can easily be replaced in case of failure, ensuring reliable operation with the highest availability of your batteries.

Das 500 kW/1000 kWh Container-Energiespeichersystem ist eine leistungsstarke, robuste Energielösung für Industrie- und Versorgungsanwendungen.

German Modular Energy Storage Unit 500kWh

Benefit from modern power electronics and flexible scalability, as well as our comprehensive service and "Made in Germany" quality for energy storage solutions.
