Is Vietnam's battery market the engine room of Southeast Asia's electrification push?

Vietnam's battery market is no longer a quiet corner of Southeast Asia, it is rapidly becoming the engine room of the region's electrification push. From electric vehicle (EV) rollouts to large-scale energy storage deployments under the Power Development Plan VIII (PDP8), the sector is witnessing unprecedented momentum.

Which companies are leading the e-mobility industry in Vietnam?

PINACO (PAC): Vietnam's leader in lead-acid batteries, adapting to serve e-mobility and industrial storage segments. Selex Motors: Developer of swappable battery systems, partnering with Be ride-hailing to electrify 3,000 drivers, signaling growth in energy-as-a-service models. Strategic Partnerships and M&A

Will Vietnam's lithium-ion battery market grow in 2021 & 2024?

According to Makreo Research, between 2021 and 2024, the market expanded at a CAGR exceeding 5%, laying the groundwork for the next growth phase where domestic lithium-ion battery production and battery energy storage systems (BESS) are central to Vietnam's strategic ambitions.

Will Bess be Vietnam's first megawatt-scale stationary Bess project?

While it is not Vietnam's first megawatt-scale stationary BESS project to date, the companies involved claimed it is the first such project to leverage third-party investment in battery storage to reduce electricity costs for a private customer. Resort operator VinPearl will pay no upfront cost for the equipment Marubeni owns.

The project's official inauguration event held in December. Image: VinGroup. A green energy subsidiary of Japanese conglomerate Marubeni has brought online a megawatt-scale battery ...

Vietnam is accelerating efforts to develop a large-scale battery storage market, aiming to strengthen its renewable energy transition. On September 12, Hanoi hosted a regional roundtable on ...

According to the Hanoi City's Official Portal, Vice Chairman of the Hanoi People's Committee Nguyen Manh Quyen recently chaired a meeting with relevant departments, agencies, ...

A Hanoi street vendor charging her EV scooter using solar panels while discussing battery specs with a

Hanoi mobile energy storage vehicle equipment

German engineer. This isn't sci-fi - it's today's Vietnam. As Southeast Asia's ...

Vietnam is one of the first three countries selected for a pilot program under a new partnership initiative between the Asian Development Bank (ADB) and the Global Energy Alliance for ...

Explore Vietnam's evolving battery industry, from PDP8-driven energy storage, lithium-ion production, swappable EV batteries, and policies shaping Southeast Asia's electrification.

Summary: This article explores Hanoi's evolving standards for energy storage charging pile equipment, including technical specifications, certification processes, and emerging opportunities in Vietnam's ...

Hanoi, June 26, 2025 - Amid a strong energy transition and Viet Nam's efforts to fulfill its commitments toward achieving net-zero emissions by 2050, the research and deployment of Battery Energy ...

Vietnam Mobile Battery Energy Storage Systems Market valued at USD 320 Mn, driven by renewable integration and EV growth, targeting 10-16.3 GW by 2030 under PDP8.

Vietnam represents a promising market for German and European small and medium-sized enterprises (SMEs) specialising in energy storage solutions, thanks to their technical expertise ...
