China has the highest cumulative solar energy capacity in the world. The IEA measures China's current capacity at 308.5 GW. The US is next with 123 GW of solar capacity. Japan has ...

Solar Star, the largest solar farm in America, produces 579 MW of power. Currently, around 2,500 MW of solar power is being built for utility-scale ...

This interactive chart shows the amount of energy generated from solar power each year. Solar generation at scale - compared to hydropower, for example - is a relatively modern renewable ...

The worldwide growth of photovoltaics is extremely dynamic and varies strongly by country. In April 2022, the total global solar power capacity reached 1 TW, increasing to 2 TW in 2024. The top ...

Solar Star, the largest solar farm in America, produces 579 MW of power. Currently, around 2,500 MW of solar power is being built for utility-scale projects. The Department of Energy ...

All data and visualizations on Our World in Data rely on data sourced from one or several original data providers. Preparing this original data involves several processing steps.

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

OverviewNorth AmericaGlobal use figuresAfricaAsiaEuropeOceaniaSouth AmericaSarnia Photovoltaic Power Plant near Sarnia, Ontario, was in September 2010 the world's largest photovoltaic plant with an installed capacity of 80 MWp. until surpassed by a plant in China. The Sarnia plant covers 950 acres (380 ha)

How much solar power is currently generated in my country

and contains about 10.3 million sq feet / 966,000 square metres (96.6 ha), which is about 1.3 million thin film panels. The expected annual energy yield is about 120,000 MW·h, which if produce...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...
