These data hammer the same powerful message: solar photovoltaic (PV) has become the new cornerstone of the global power sector. In all areas: electricity generation growth, installed ...

This paper uses TOPSIS to establish a comprehensive evaluation index system for the international competitiveness of solar photovoltaic products to study the international ...

In order to correct the flaw that the RCA index can only be studied from trade volume, this study adopts the IRCA index method and the revised CMS model, which integrates a number of variables to ...

Based on the global PV patenting data from 1970 to 2018, this paper reveals the network structure of international PV technological competition and further explores the competing relations ...

Wednesday 8 October 2025, London and Nairobi: A new international competition recognising the best solar-powered generators for use in energy constrained settings, opens for nominations today.

These activities amplify the impact of research and development projects and enable the private sector to develop and sustain new solar products that can be manufactured in the United States. The goal ...

Solar PV accounts for almost 80% of the global increase, followed by wind, hydropower, bioenergy and geothermal. In more than 80% of countries worldwide, renewable power capacity is set to grow faster ...

Utility-scale PV led global installations, but distributed PV remained strong in key markets including Germany, Türkiye, and Brazil. Curtailment is increasingly prevalent in high-penetration markets, ...

Global solar PV deployment is entering a phase of adjustment. After several years of rapid expansion, installation growth is stabilizing across multiple major markets.

International competition for solar photovoltaic power generation
