Fully integrated with Powerhub, Microgrid Controller provides real-time control of paralleled grid-forming sources and variable renewable generation, as well as intelligent load and solar forecasting.

Discover all relevant Microgrid Companies in Ireland, including ESB and Electric Ireland

This is the first time this has been done in Ireland. We are trying to be as innovative as possible to minimise disruption while developing the grid in a seriously congested part of the...

Our microgrid solutions are designed to provide reliable, secure, and sustainable power to remote or off-grid communities, industrial sites, and other critical facilities.

Data centre operators could build their own electricity "microgrids" after being blocked from accessing the national energy system, according to the new vice president of Schneider Electric Ireland.

Unlocking the full potential of microgrids in Ireland will require a more agile regulatory and planning environment. Streamlining approval processes and incentivising demand-side solutions are ...

Off-grid and microgrid energy solutions are adding more wind and solar power to their mix, benefitting from optimised use of their generators and lower energy costs.

Our pre-engineered microgrid control centres have all the components you need for power management, control, energy metering, and power monitoring. In addition, our microgrid ...

Chris Collins, Country President Ireland, Schneider Electric, outlines the challenges and opportunities of integrating energy efficiency and microgrids into the energy landscape.
