-----

Japan targets 38% renewable electricity by 2030, well below the 60% global share set out in the IEA Net Zero Emissions scenario. While headwinds exist for renewables growth in the country, ...

METI Sets the Surcharge Rate for FY2024, the Renewable Energy Purchase Prices for FY2024 Onward, and Other Details Relating to the FIT and FIP Schemes (March 19, 2024)

While solar power continues to show significant progress, becoming a dominant renewable energy source in Japan, other renewable sources including wind and geothermal are lagging.

In 2023, Japan's electricity generation was 14.3% lower than in 2010, due to demographic trends and energy efficiency measures. In contrast, renewable energy -- which included solar, wind, ...

Below, we examine policies affecting generation from non-fossil fuel sources, namely renewable sources and nuclear generation in the first part of a two-part series on Japan's energy ...

Japan is a major consumer of energy, ranking fifth in the world by primary energy use. Fossil fuels accounted for 67% of Japan's primary energy in 2023. Japan imports most of its energy due to scarce domestic resources. As of 2022, the country imports 97% of its oil and is the largest liquefied natural gas (LNG) importer globally. Japan is increasing its reliance on renewable energy to replace imported fossil fuels...

Japan is increasing its reliance on renewable energy to replace imported fossil fuels, and in 2019 renewable energy accounted for 7.8% of primary energy supply.

It is estimated that the share of renewable energy in Japan's total electricity generation including self-consumption for the calendar year 2024 was 26.7% as preliminary value, an increase of 1 ...

Renewable energy sources accounted for 25 percent of Japan's overall electricity output in 2023, but the country's standing is still lower than the average global share of more than 30...

# Japan renewable electricity

Most Japanese people support the use of renewable energy sources, while nuclear energy and fossil fuels are less approved of.

We believe that the 40-50% share of renewables in the 7th Strategic Energy Plan is not sufficient for Japan to be a competitive site for business operation.
