Solar energy in Japan is emerging as a cornerstone of Japan's strategy to meet its ambitious long-term sustainability goals. The Sixth Strategic Energy Plan aims for carbon neutrality ...

Japan's Sixth Strategic Energy Plan was agreed in 2021, and formed a plan for 2030. It includes a large planned scale-up of solar, an increase in onshore wind, and a new offshore wind industry.

Japan wants renewable energy to account for up to 50% of its electricity mix by fiscal year 2040 with nuclear power taking up another 20%, ...

Japan wants renewable energy to account for up to 50% of its electricity mix by fiscal year 2040 with nuclear power taking up another 20%, according to a draft of its revised basic energy...

Solar power is anticipated to become the predominant renewable energy source by 2040, reflecting the government's ambitious targets. This Plan opens up substantial opportunities for ...

Most Japanese people support the use of renewable energy sources, while nuclear energy and fossil fuels are less approved of.

This article shines light on the forefront of Japan's policy regarding renewable energy, which is also expected to contribute to global efforts toward tripling renewable energy.

Two new agreements add solar energy to multiple electricity grid regions in Japan, as we make progress on our 24/7 carbon-free energy goal.

This core Clean Energy Scenario evaluates transition from Japan's non-fossil electricity generation goal for 2030 to a 90% clean generation electric system by 2035.

Solar PV comprises the bulk of the growth in renewables to 2040. With limited land available for large-scale

Japan s power plant clean solar energy

renewable projects, Japan has already taken advantage of its inland lakes and reservoirs to ...

Below, we examine policies affecting generation from non-fossil fuel sources, namely renewable sources and nuclear generation in the first part of a two-part series on Japan's energy ...
