The initial target for renewable energy in 2020 was 3% of total electricity generation. By the end of 2024, this share had more than doubled to 6.4%, meeting the interim goals of the ...

The market research report covers market dynamics, growth potential of the photovoltaic (PV) and concentrated solar power (CSP) markets, economic trends, and investment & financing scenario in ...

Power from wind, solar, biomass and water up to 35 MW, plus geothermal sources, are eligible for the tariff and transmission companies are required to purchase the energy of renewable energy producers.

By increasing the share of renewables to 35 percent by 2035, Kazakhstan could reduce power sector emissions by 4 percent compared to 2023 while lowering system costs by 40 percent compared to ...

The Altyn Dala Solar Power Station is expected to have significant environmental and economic impacts. By expanding the country's solar energy capacity, the project will help reduce ...

The Government of Kazakhstan has developed an action plan for electric power development through 2030, which includes a list of proposed power plants for modernization or ...

The Republic of Kazakhstan has the potential to generate 10 times as much power as it currently needs from wind energy alone. But renewable energy accounts for just 0.6 percent of all power installations. Of that, 95 percent comes from small hydropower projects. The main barriers to investment in renewable energy are relatively high financing costs and an absence of uniform feed-in tariffs for electricity

Discover how energy storage systems are transforming Kazakhstan's power generation landscape while addressing renewable intermittency challenges.

On June 19, 2025, an auction was held to select renewable energy projects for the construction of a solar power plant (SPP) in the Southern Zone of Kazakhstan's Unified Power System (UPS), with a ...

In 2012, the first solar power station, "Otar," that generates 0.5 MW of energy, was also built in the Zhambyl region. Another solar power plant with a capacity of 52 kW was built in Sarybulak village, ...

The focus now is on leveraging solar's comparative advantages to drive forward Kazakhstan's decarbonisation and harness its significant solar resources. This report builds on the ...
