While not confirmed, congressional leaders have said the point could be debated again in Senator Eduardo Braga's report. Momentum is also gathering for a legal framework for energy storage.

A complete 2026 guide to Brazil's commercial & industrial energy storage market. Learn policies, PDE 2034 trends, ANEEL regulations, 100-241 kWh system selection, 2 MW parallel ...

Brazilian battery manufacturer Powersafe announced its entry into the solar market and launched a photovoltaic energy storage hybrid system solution. The company has factories in Sao ...

Representatives of ABSolar, the Brazilian Association of Energy Storage Solutions, and the Brazilian Wind Energy Association called for regulation at a breakfast held at the Federal Senate ...

Photovoltaic (PV) adoption within Brazil's distributed generation (DG) framework has expanded significantly following legislative milestones in 2012, 2015, and 2022, emphasizing the ...

Starting in 2025, Brazil implemented a new policy (Resolution No. 1074 of 2023) to charge distribution grid usage fees based on installed capacity for distributed PV, but projects connected ...

Brazil's new policy creates a powerful foundation for solar energy battery storage growth. It combines regulatory clarity, financial incentives, and market changes to make solar storage...

The enactment of Law No. 15.269/2025 represents a watershed moment by recognizing energy storage as an integral resource of the national electricity system and inaugurating the legal ...

Brazil's new 2025 energy storage regulations create urgent opportunities for businesses to pair solar with lithium batteries. Here's why: Overloaded grids cause interconnection delays for DG ...

Latest on Brazil s photovoltaic energy storage policy

Brazil gets 84% of its electricity from renewables, mainly hydropower. But here's the plot twist: droughts are making reservoirs unreliable. Enter energy storage - the flexible sidekick to solar ...
