---

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

With the rapid rise of renewable energy, the 2023 National Electrical Code (NEC) has introduced critical updates to ensure the safety and efficiency of solar, wind, and energy storage systems.

Explore NEC 705.12 & 705.13 for safely connecting DERs like solar/wind to homes. Learn how HEMS simplify power flow, prevent overloads & boost resilience.

Consistent with the Executive Order, the New Notice does not apply to other project technologies that are eligible for the CEPC and CEIC, including energy storage, geothermal, and nuclear.

To highlight the role and impact of zoning ordinances in renewable energy siting, the National Renewable Energy Laboratory (NREL) recently published a database of local ordinances for wind ...

Texas House Bills 3809 and 3228 introduce significant changes to the decommissioning and recycling requirements for Battery Energy Storage Facilities ("BESFs"), Solar Power Facilities, ...

On July 7, 2025, President Trump issued Executive Order 14315 directing the Treasury to "strictly enforce" the termination of the PTC and ITC for solar and wind facilities.

CRGA updates statewide siting rules for wind, solar, and storage, adds fee limits, faster hearings, longer timelines, and new energy storage standards

Below, we break down the major regulatory and policy updates chronologically, with notes on what they mean for developers, communities, and the future of renewable energy.

# Latest requirements for wind solar and energy storage

Guide to Safe Harbor rules under OBBBA for clean energy tax credits, with key deadlines, methods, and strategies for solar, wind, and battery storage.
