---

The results, which were demonstrated by practical experiences of the different possible configurations for the engine studied showed high potential for reducing emissions, but the most ...

A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and ...

Light exhaust gas re-circulation (EGR) optimizes combustion temperatures and further reduces NOx emissions. And a diesel particulate filter (DPF) removes most remaining PM out of the exhaust. We ...

The Port Authority of Lisbon (APL) and the Port Authority of Setúbal and Sesimbra (APSS) participated in the fourth edition of the Electric Summit - Energy for Life, where they ...

Among the multiple advantages that it offers, the gas-engine-based solution does not generate soot particles or Sulphur oxides (SOx), while producing 80% fewer NOx emissions and less greenhouse ...

As renewable energy adoption accelerates globally, Lisbon emerges as a strategic hub for innovative containerized energy storage systems. This article explores how modular energy storage solutions ...

Our gas generator set, utilizing biogas from agricultural waste, significantly reduced energy costs and carbon emissions. The project not only improved the cooperative's productivity but also set an ...

The Atlas Copco QEC generators packs a punch, up to 1 megawatt of containerized power that can be easily transported from one worksite to the next. Supremely reliable, it is the flexible solution for your ...

Green Power Systems offers the possibility of installing generators inside CONTAINERS of 10" / 20" (BOX and HC) / 30" / 40" (BOX and HC) or SHELTERS according to the customer's requirements. All ...

# Lisbon container generator low emissions

From gas hybrid to super efficient diesel, there are a wide range of low emission generators available in 2021. Lowering carbon emissions in every way possible is more important ...
