---

Battery energy storage is crucial to making Michigan's electric grid cleaner, more reliable and more resilient. These systems store electricity when supply exceeds demand and release it back ...

Most local governments do not have enough roofs or local land space to deploy on-site solar to power all their operations. To achieve their 100 percent clean electricity goals, they will need ...

By championing state and local leadership, addressing specific market barriers, and promoting standardized approaches, the Solution Center aims to help states, local governments, and K-12 ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

The EECBG Program will distribute nearly \$11.6 million to 49 state, local, and Tribal governments to improve energy efficiency, promote conservation, and lower overall energy use.

Energy storage is not a new phenomenon, given the early history of harnessing power through water wheels and mill ponds, but in recent years, storage has gained increased attention with ...

IREC offers multiple programs that deal with best practices around large-scale renewables, with various projects designed to equip local governments with the resources and tools to ensure ...

A policy explainer that explores how energy storage policies play a pivotal role in facilitating the transition to clean energy, with insights into effective policy frameworks for maximizing ...

These terms describe various ways states may set an intention to attain a specified level of energy storage deployment by a specific date, and the role of regulated electric utilities in helping realize that ...

# Local governments increase energy storage projects

This report provides an overview of BESS from a land use perspective and describes their implications for zoning and project permitting. It concludes with an analysis of current energy storage zoning ...
