-----

The utility company recently expanded the London Street hydro power generating station on the Otonabee River to produce an additional six megawatts, bringing the station's total capacity up to 10 ...

The Project includes a 6 megawatt (MW) hydroelectric generating station located adjacent to PUI's existing four (4) MW generating station on the Otonabee River at London Street.

Station names should refer to famous streets or sights nearby rather than the vertical street neighbouring the station, making it easier for visitors to find these places.

The project will extend the life of the existing, nearly 100 year old, power station and ensure that renewable energy will continue to be produced at this valuable facility for another hundred years.

Turn around and you look down into their street, Lynmouth Road, which Dan and Hilary want to turn into a solar power station. They are living on their roof as a crowdfunder for the project. "I...

London Street Generating Station is located on the Otonabee River in the heart of Peterborough and has two plants with a total output of 10 MW: Plant 1 was built circa 1915 with three Francis turbines for a total ...
