In article number 1900538, Juntao Li, Yue Wang and co-workers report the room temperature laser-like emission from a sandwiched MoTe₂ heterostructure on a silicon single mode resonator at 1319...

China Southern Airlines: Flying Towards a Carbon-Neutral Future Don't miss out on this exciting glimpse into our "carbon-neutral" flight and be inspired to make a difference.

From 2009 to 2016, research on DC microgrids in China has gradually involved many different aspects, such as the study of DC microgrid power electronic converters, DC circuit breakers, and other key ...

As the photovoltaic (PV) industry continues to evolve, advancements in Microgrid China Southern Airlines Wang Xuehua have become critical to optimizing the utilization of renewable energy sources.

This research introduces a novel application of Prahalad and Ramaswamy's value co-creation theory by analyzing 60 microgrids throughout China as case studies.

An overview of experiences with microgrids policies in China shows that optimal capacity planning for microgrid, energy storage technologies, and incentive market policy are key factors to ...

Abstract: Mobile power sources (MPSs) have been gradually deployed in microgrids as critical resources to coordinate with repair crews (RCs) towards resilience enhancement owing to their flexibility and ...

These experiments utilize the load frequency control (LFC) model of the Sansha isolated microgrid, operated by the China Southern Power Grid. The outcomes of these simulations ...

Since 2008, he has been with Huazhong University of Science and Technology, Wuhan, China, where he was

Microgrid China Southern Airlines Wang Xuehua

a Postdoctoral Fellow from 2008 to 2011 and is currently a Professor with the School of ...
