How is Morocco accelerating its energy transition?

Morocco is accelerating its energy transition by issuing a global call for expressions of interest to build two large-scale battery storage facilities. The projects are spearheaded by the Moroccan Agency for Sustainable Energy (MASEN) and Morocco's national electricity company ONEE.

How many jobs will a battery energy storage project create in Morocco?

The first phase of the project is expected to create over 2,000 jobs. In terms of energy storage projects, Morocco is actively introducing battery energy storage systems (BESS) to complement renewable energy. Several Chinese companies are involved in this.

What is Morocco's energy storage testbed project?

The projects are spearheaded by the Moroccan Agency for Sustainable Energy (MASEN) and Morocco's national electricity company ONEE. On May 20, 2025, MASEN received financing approval from the World Bank for its "Morocco Energy Storage Testbed Project", aiming to enhance grid stability.

Who will participate in a new energy project in Morocco?

Chinese state-owned enterprises such as PowerChina and China Energy Engineering Corporation (CEEC), which have experience in undertaking new energy power stations and energy storage projects in Morocco, are also expected to participate in the bidding with an EPC plus long-term operation and maintenance model.

The north-west African country plans to build a 1,600 MW battery energy storage system to support its expanding renewable energy sector. The national power utility company is set to invite bids for the ...
