The Kingdom of Morocco is solidifying its position in the global electric vehicle (EV) supply chain with two large-scale projects slated for completion in 2026.

Chinese BTR Morocco is building a major lithium battery gigafactory, turning Morocco into a strategic hub for Europe and Africa's energy transition.

The Tinci project aligns with Morocco's ambition to become a regional hub for renewable energy and electric mobility. By attracting one of China's battery giants, Morocco strengthens its ...

Among the efforts to eliminate cobalt from lithium-ion batteries is the work of a Moroccan researcher, Elhoucine Elmaataouy, from the Mohammed VI Polytechnic University (UM6P), who is...

Energy transition is taking a new step in Morocco. In partnership with Moroccan authorities, Gotion High-Tech, a specialist in energy storage, has begun construction of a gigafactory ...

The project responds to global supply chain relocalization trends and European carbon border adjustment requirements, transforming Morocco from raw materials exporter to global ...

Morocco is emerging as a new hub for the lithium battery industry, driven by abundant resources, LFP technology, and rapid development of full supply chains.

This pioneering facility, with an initial capacity of 40,000 tons, marks a significant milestone in the establishment of a comprehensive battery ecosystem in the country. Spanning over ...

Rather than merely exporting raw materials like cobalt and phosphates, Morocco aims to develop a full-fledged industrial ecosystem around battery technology. Several factors position ...

Thanks to its natural resources, advantageous geographical position and strategic partnerships with global

Morocco lithium-ion battery technology

players, Morocco aims to become a regional hub for sustainable ...
