What is EEX's Nordic power product portfolio?

EEX's Nordic power product portfolio consists of System Price futures as well as zonal futures for all Nordic bidding zones, enabling market participants to choose the most suitable tools for their hedging needs, and ultimately improving liquidity across these markets. EEX Nordic Power Futures

How has the Nordic power system changed in 2024?

The Nordic power system and its electricity market have always been closely linked and in recent years, both have faced profound change. The biggest shift came on 30 October 2024, when the day-ahead (DA) market switched from the long-used Available Transmission Capacity (ATC) method to Flow-Based Market Coupling (FBMC). What is the difference?

What's new in the Nordic market?

The other significant, recent change in the Nordic market is the new Nordic balancing model, which went live on 4th March 2025. More on that in the last section of this blog.

What is Nord Pool & Euronext?

Nord Pool, the European power market, is to enter a new area of business with the announcement that it will launch, together with Euronext, a dedicated Nordic and Baltic power derivatives market. The new Euronext Nord Pool Power Futures market will be traded on Euronext's Optiq trading platform and cleared by Euronext Clearing.
