-----  
How much does solar cost in NZ?

For example, a typical NZ household using 8,000 kWh/year would have paid around \$2,300/year in 2019, and faced bills closer to \$2,900/year in 2024. While power prices rise, solar installation costs have steadily fallen thanks to improved technology, better efficiency, and a growing local solar industry.

Can solar power save you money in New Zealand?

Prices include overheads and GST. Solar can save the average New Zealand home \$1,000 or more on their power bill each year, no matter where they live (EECA analysis). Here's how. The more solar power you use, the less electricity you need to pay for. That's how solar can significantly cut your power costs, creating those big savings you want.

How much does a 5kW Solar System cost in New Zealand?

The average cost to install a 5kW system in New Zealand is now around \$11,000-\$13,000, compared to \$15,000+ just a few years ago. With systems lasting 25+ years and minimal maintenance required, the upfront investment quickly pays for itself. Rising energy prices + falling solar costs = faster return on investment for NZ households and businesses.

How many solar panels do I need in New Zealand?

Figuring out how many solar panels you need for your home in New Zealand doesn't have to be a head-scratcher. It all comes down to your household's energy habits, roof space, and how much sunshine your area gets. Most Kiwi homes opt for systems between 4kW and 8kW, which translates to around 9 to 19 solar panels.
