How long does a portable power station last?

A portable power station's lifespan is largely determined by its battery cycle life. This means the amount of times it can be charged and recharged before capacity drops.

How many times can a Pisen power station charge a phone?

Put it this way: the highly popular Pisen Portable Super Fast Charging Outdoor Power Station 1000W can charge your smartphone around 100 times in one go - which means, theoretically, the power station can charge your phone up to 100,000 times before it even starts to drop capacity.

How long does a battery last in a power station?

This means the amount of times it can be charged and recharged before capacity drops. Most modern power stations, including Pisen's models, use lithium batteries, which typically last hold 500 to 1,000 charge cycles (battery cycle life) before their capacity drops to around 80%.

A portable power station is a rechargeable battery + inverter + charge controller with multiple outputs (AC, 12 V DC, USB/USB-C). It doesn't include solar panels by default -- you can add ...
