Does PG&E have a microgrid?

PG&E has deployed 13 distribution microgridssince 2021 to support communities affected by Public Safety Power Shutoffs (PSPS),with Calistoga being the largest and first fully renewable system. These microgrids can help keep communities and essential services--like fire stations,medical facilities,and grocery stores--powered during outages.

What is Caballero energy storage?

Caballero CA Storage,LLC (a wholly owned subsidiary of Origis USA,LLC) - The Caballero Energy Storage project is comprised of a 99.7 MW stand-alone,transmission-connected battery energy storage resourcelocated in Nipomo,Calif. (San Luis Obispo County) and scheduled to be online by June 2024

How does PG&E's CAISO project work?

The project now integrates all three signals via software from Tyba,an energy storage optimization platform that in February raised a \$13.9 million Series A from Energize Capital. Tyba's software co-optimizes PG&E's instructions with CAISO market opportunities to sell any unused capacity.

Why did PG&E choose Lakeview?

The Lakeview Project was designed to meet a relatively straightforward request from PG&E: discharge one MW for three hours during summer peak demand periods to relieve stress on a constrained distribution feeder. But the feeder's existing voltage issues created a problem: White Pine couldn't freely charge the battery without worsening the issue.

At PGE, we are leading the way to a clean energy future reliably and affordably. Battery storage is an important component of the clean energy economy. These new projects are a significant ...

Pacific Gas and Electric Company (PG& E) is proposing nine new battery energy storage projects totaling about 1,600 MW, as part of its mission to make California's electric grid stronger and ...

Portland General energizes 1.9 GWh of lithium batteries in major storage expansion The Seaside, Sundial and Constable battery projects bring the Oregon utility's large-scale storage ...
