For the second year in a row, the SolarReviews Solar Industry Survey, in partnership with the North American Board of Certified Energy Practitioners (NABCEP), has uncovered unique trends ...

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and market evolution from 1992 to 2024.

National summary: Storage pricing trends Storage prices dropped 12% from H1 to H2 2024, dipping just below \$1,000/kWh.

This expansion is fueled by several key trends, including the decreasing cost of lithium-ion batteries, technological advancements improving energy density and lifespan, and the rising ...

o In 2024, between 554 GW. dc. and 602 GW. dc. of PV were added globally, bringing the cumulative installed capacity to 2.2 TW. dc. o China continued to dominate the global market, ...

Each quarter, new industry data is compiled into this report to provide the most comprehensive, timely analysis of energy storage in the US. All forecasts are from Wood Mackenzie Power & Renewables; ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse and sustained growth of solar across the country.

account for more of our nation's energy mix than ever before. To study America's growing renewable electricity capacity and generation, Climate Central analyzed historical data

Photovoltaic energy storage sector trend chart

The US Energy Storage Monitor is offered quarterly in two versions- the executive summary and the full report. The executive summary is free, and provides a bird's eye view of the U.S. energy storage ...
