Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector. The focus is on ground-mounted systems larger than 5M AC, including ...

To start, it's essential to know typical panel sizes, wattages, and efficiencies used in residential, commercial, and utility-scale installations. Below are comprehensive tables with values ...

Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites. The Global Solar ...

Deciding where solar projects will be installed is one of the very first decisions to be made in a project development timeline. Explore the many factors to consider when selecting a site.

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to ...

Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

Discover how much area is needed for a solar panel installation and how to calculate roof space for solar in this comprehensive guide for homeowners in the U.S.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Find and download resource map images and data for North America, the contiguous United States, Canada,

Photovoltaic panel project area

Mexico, and Central America. View an interactive map or download ...
