For the latest updates and more information, visit our website: <https://www.2xt.com.pl>

Our quality experts sharpen a client's competitive edge by providing expert advice, verifying supplier reliability, improving factory performance, controlling solar panel quality, and ensuring compliance ...

We provide testing and certification for PV modules, components, and energy storage systems covering safety, performance, EMC, and efficiency. Our services include product development support, ...

SolarPTL provides independent solar plant quality services using calibrated test equipment for performance degradation analysis and warranty/insurance claims related to string and module ...

The NLR Photovoltaic (PV) Device Performance group provides certification, testing, and calibration services that help set global standards while defining industry best practices. We help PV ...

NLR's photovoltaic (PV) device performance services include high-precision performance testing, certification, and calibration of PV cells and modules, governed by rigorous global standards ...

Our lab also provides calibration and certification service that prolongs the lifetime of any reference detector whose spectral responsivity is used for calibrated measurements.

Depending on your place in the value chain, there are several types of testing for both photovoltaic (PV) panels and peripheral equipment. We can help you identify and complete the testing that makes ...

Intertek CEA provides PV module testing, EL inspections, and quality audits to ensure defect-free solar panels and maximum performance.

VLSI has over 20 years of experience in supplying traceable Calibration Standards to industries where measurement accuracy and instrument monitoring are required.

Photovoltaic standard panel calibration agency

Through our in-depth expertise in the latest standards and state-of-the-art technological developments, we can check and confirm the safety and reliability of your PV modules.
