All solar segments set annual installation records except for residential solar, which experienced its lowest year of new capacity since 2021. The factors driving installation growth in ...

The Solar Energy Industries Association (SEIA), established in 1974, is the American national non-profit trade association of the solar-energy industry in the United States. [2]

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

SEIA now expects the US to add 55GW less solar capacity by the end of the decade, compared to its forecasts made before the passage of the "One Big, Beautiful Bill".

The full Solar Market Insight Report includes all the data and analysis from our Executive Summary plus incisive, state-level breakdowns of installations, costs, manufacturing and demand ...

US Solar Market Insight 2024 Year In Review was published by Wood Mackenzie and the Solar Energy Industries Association (SEIA) on March 11 and includes data about the US solar ...

The U.S. added almost 10 GW of new utility-scale solar power generation capacity in the first quarter of this year, led by new installations in Texas and Florida.

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

Annual solar installations required (GWh) for solar energy to reach 20% of U.S. electricity generation by 2030, according to SEIA's 10-year roadmap, The Solar+ Decade: Roadmap for Building the Solar+ ...

Forecasts from the U.S. Solar Energy Industries Association (SEIA) show sustained growth through 2030.

Seia solar power generation

Solar energy continues to charge ahead, increasingly becoming an essential ...
