Does Senegal have solar power?

Fortunately, Senegal has a high potential for solar energy, enjoying around 3,000 hours of sunlight annually. In 2023, solar power made up 47.4 percent of the country's renewable energy portfolio, followed by hydro and wind power.

Can renewables improve energy access in Senegal?

How Renewables Can Advance Energy Access and Ec... In recent years, energy has been at the front of Senegal's national agenda. The country has made significant progress on electricity access, which rose from 39 percent in 2001 to 74 percent in 2023, one of the fastest increases in Africa.

Is Senegal ready for a solar energy transition?

This transition is expected to be fueled by the Just Energy Transition Partnership (JETP) as well as private sector investment. Fortunately, Senegal has a high potential for solar energy, enjoying around 3,000 hours of sunlight annually.

How will Senegal contribute to the energy transition?

The country's nationally determined contributions outline two main goals relating to the energy transition: increasing the share of renewable energy in the national energy mix to 40 % by 2035 and increasing the use of natural gas to replace fossil fuel power plants (CDN Senegal, 2020).

Senegal's power system still relies heavily on fossil fuels, and fuel oil in particular, but the country has also shown impressive growth in renewable power capacity and generation over the ...
