New Strider report identified widespread dependence on inverter equipment supplied by high-risk PRC manufacturers such as Sungrow and Huawei.

Leading renewable energy operators worldwide are confronting a disturbing supply-chain vulnerability: undocumented communication modules found in Chinese-made solar inverters and ...

In a plot twist worthy of a techno-thriller, U.S. energy officials have uncovered rogue communication devices embedded within Chinese-manufactured solar power inverters.

On May 14, 2025, U.S. energy officials began investigating Chinese-made solar power inverters after discovering undocumented communication devices, including cellular radios, inside some units, ...

The increasing reliance on renewable energy sources, particularly solar power, has brought a critical vulnerability into sharp focus: the widespread use of Chinese-made solar inverters ...

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication...

Following the discovery of unknown communication devices in Chinese solar inverters, US energy authorities want to reassess their risk. During the investigation of inverters from China by...

Unexplained communication devices have been found inside some Chinese-made inverter devices, according to a Reuters report. The news agency claims US energy officials are ...
