Error 101-104 (Grid Voltage/Frequency): These errors indicate issues with your local grid. First, check if there's a known outage in your area. If not, verify that your AC connections are secure. Persistent ...

The table below lists inverter error codes you may see on your solar system. You will notice that a lot of the codes are due to grid voltage variations which the inverter responds to.

Learn about SMA Error Code 101, its meaning, causes, and solutions for grid voltage issues. The SMA Error 101 indicates that the inverter has detected that the grid voltage is outside the permissible limits ...

This page outlines the possible meanings of common fault codes across a range of inverter brands used in Australia. Understanding these codes may help you to diagnose and address your ...

Event number 1 and the 3-digit event numbers indicate that the grid voltage or grid impedance at the connection point of the inverter is too high. The inverter disconnects from the utility grid to maintain ...

In this article, we will provide a comprehensive explanation for all messages generated by Solis inverters, ranging from operating messages to alarm messages. We'll not only decipher what ...

Analysis of common solar inverter error codes (string, ground fault, isolation faults) in 2026, comparing troubleshooting costs, failure rates, and predictive maintenance strategies.

To support efficient troubleshooting, SolarEdge inverters present status and telemetry information through the LCD screen (when available) or the connected platform. This information includes error ...

Although beautifully simple, solar PV installations are like any other electronic system: on occasion they could go wrong. This article looks at some of the most common solar inverter error ...

Learn how inverter fault codes affect performance, safety, and output. This practical guide explains causes,

# Solar inverter fault code 101

fixes, and prevention for solar systems today.
