TELO and Apera will make these solar panel options available for pre-order later this year. The fully realized drivable prototype is currently in production at Aria Group, which joined forces with TELO in ...

Electro-mobility plays a key role to achieve climate neutrality. Electric vehicles, partially powered by vehicle-integrated photovoltaics, are now emerging in the market. This study reviewed more than 270 ...

Especially for delivery vans, buses, and long-range EVs, solar-assisted technology can offer consistent energy input throughout the day. This not only lowers charging frequency but also contributes to greener mobility ...

Following preliminary analyses that demonstrated the feasibility and convenience of electric vehicles operating independently of charging stations, the IEA's PVPS recognized the transport sector as a promising area for ...

Designing with photovoltaics (PV) is the core focus of this paper which presents the results of a design study on conceptual PV applications for electric mobility systems.

Less electric consumption means fewer indirect emissions. With Hyundai's scalability, the system's durability will be decisive. If it withstands a decade, it will become a silent ally of sustainable ...

In Munich this week, Opes Solar Mobility was unveiling its new generation of flexible solar panels, which are also among the finalists for the Smarter E Award in the E-Mobility category.

Solar mobility involves more than just charging electric cars with green electricity; it also involves integrating photovoltaics (PV) into vehicles. It is a concept that not only supplies energy, but also fundamentally ...

We discuss the benefits of incorporating photovoltaic systems into EVs, such as reduced grid dependency and increased vehicle autonomy, and examine strategies for optimizing integration,...

Solar panels for electronic mobility

Vehicle Integrated Photovoltaics (VIPV) supports the transition to electrification of the mobility sector. Our products are developed according to vehicle-specific requirements and customized to perfectly fit.
