It allows you to program in temperature effects (cold batteries deliver less capacity), and it takes into account Peukert's effect, i.e., your 130Ah batteries only have 130Ah when you're pulling ...

In most cases, this is the same as your battery voltage. Common system voltage levels are 12V, 24V, or 48V. This is the peak output current your solar panels or array can produce. ...

I've never seen a controller that just stops charging and never recovers when the panels are pushing power at it. They need to fix this but there's no indication that they even understand the problem.

Check the inline fuse between the battery and the controller and your battery and terminal block connections on the controller. If the controller is in an error state first try a soft reset. (Only on 4 ...

A problem that a DIY solar power enthusiast may someday face is to find a solar panel [or a whole solar panel array] has good output voltage - but does not produce any power when ...

This issue may stem from a malfunction in the MPPT solar charge controller or the solar panels themselves. To troubleshoot, check for shading on the panels, faulty wiring connections, or ...

If your solar system's volts were 12 and your amps were 14, you would need a solar charge controller that had at least 14 amps. However due to environmental factors, you need to factor in an additional ...

Note: If your solar panel controller also has a regulated Voltage output (Voltage is never more than 12-13V DC) then the current supplied to the battery may depend on the voltage that the ...

As per the basic solar charge controller settings, it is capable of accommodating a maximum input voltage of 12 volts or 24 volts. You need to set the voltage and current parameters ...

When I manually check the battery voltage, everything attached, in direct sun, the voltage displayed is only

Solar power controller only has 12 3v

the battery"s voltage. If I disconnect the solar panel and check its voltage alone, it is ...

When I manually check the battery voltage, everything attached, ...

I"ve never seen a controller that just stops charging and never recovers when the ...
