A fire has broken out at a California power plant that is home to the largest battery storage facility in the world, as hazmat teams warn residents to close all windows and doors. The ...

No, that's not true: Fire officials said the fire at the Moss Landing facility started inside a building operated by Vistra Energy, not at a nearby Tesla battery storage area.

Officials in Monterey County said it caught fire Thursday afternoon, prompting evacuation orders for over 2,000 people. County officials said at a press conference Friday that the fire caused no...

In a startling incident that has reignited concerns over lithium-ion battery safety, a fire erupted at Tesla's battery storage facility in Tilburg, Netherlands, on December 28, 2024.

Officials in Monterey County said it caught fire Thursday ...

Musk's 256 Megapacks battery storage facility is next to the Vistra battery plant, but it isn't the same as the one that has ignited at least twice over 24 hours.

A major fire at one of the world's largest battery storage plants in Northern California sent up flames of toxic smoke. The fire that started Thursday and was largely put out by Friday led to the evacuation of ...

The fire happened as the system was under construction and destroyed two of the 212 Tesla Megapack battery energy storage system (BESS) units being installed.

Let's catch up on what happened in this fire, what the lingering concerns are, and what comes next for the energy storage industry.

A massive fire erupted at a California power facility that houses the world's most extensive battery storage system, which houses several Tesla batteries. Hazardous materials teams ...

# Tesla energy storage system explodes

In September 2022, a fire ignited in a single Tesla Megapack at PG& E's Elkhorn facility, five months after the battery energy storage system came online.
